

The Culture of Poverty	Action plan
<p>Describe things you intend to do differently to value and support parents in your program.</p>	
<p>Think about your community. List ways in which your community supports those in poverty. Are there other ways – not in place – that you think could support parents in gathering resources to help?</p>	
<p>List three changes you intend to make in your practice to help strengthen parenting among the families you work with.</p>	
<p>What activities or action steps do you see yourself implementing in your work that might be possible in the next week or month?</p> <p>Create a plan around those possible changes and how they will impact the families you serve.</p>	
<p>How do you see your practice/agency changing as a result of learning more about the impact of poverty for families before stress (other issues) becomes a precursor to abuse/neglect?</p>
